

## **VENTILATION DESIGN TECHNICIAN**

An airport consulting firm located in the City of San Antonio is seeking an experienced individual to perform residential ventilation design and testing activities. Applicants should possess knowledge of residential construction and the operation, function and design of residential mechanical systems. Five (5) years experience in residential HVAC systems and knowledge of ventilation testing equipment and terminology. Possess a working knowledge of Excel and CAD computer programs. Must be able to pass extensive criminal background check and drug test. Spanish is a plus. Salary of \$45-60K, depending on qualifications, plus full company benefits.

Qualified applicants should forward their resume with salary requirements by e-mail to: [resumes-sat@thcinc.net](mailto:resumes-sat@thcinc.net) or by fax to 210-824-1997, Attn: Construction Manager.
